

First Horoscope done by Ojah

Comments: First of two charts done by Ojah, probably in July of 1977. I come to this conclusion based on statements of Tamal Krishna Goswami and the letter from Abiram that is included after this chart from Ojah. Though it is not signed it can be identified by comparing it with the handwriting in the second (signed) chart that he did and the fact that Ojah was the only astrologer to use the time of birth that Srila Prabhupada supplied, namely 4:00 PM. This is a basic chart of Prabhupada's life to the time of consultation. Ojah was the only astrologer to make verifiable statements about Srila Prabhupada's past life. On the scan images are many check marks beside each statement that the astrologer made this seems to indicate that Prabhupada had his servant tick them off to indicate that they were true statements. There are also some notes written in the margin which seem to be annotations of the servant. Most of these notes are illegible on the scanned Xerox copies available.

Birth - Capricorn is rising.
moon is in Taurus along
28" 6 minutes with Mars

causing trouble in throat and
stomach

used to be
set at 22 1/2 m

- Youth - till 22 - good education
- good father attention
- sometimes no mental peace

22 - 38 - Brihaspati follows this period
for 16 years till 38 -

- / - great increase in spiritual activity
- / - Benefit from Brahmins and
sannyasis
- / - ill health of the wife during that
period - (at some time)

38 years 5 months - Mahadasa of Saturn.

Everything
there

- / - great interest in philosophy
- / - writing ability and activity
increase
- / - sometimes secluded.

at that period - rise in life due to contact with saints.

58 years (57-5-29)

Buddha Mahādasa starts.

- very convincing way of talking
- it is connected with Venus
- at that time there is rise until the top of the career
- foreign travels auspicious

Not v. much
illuminations
longer!

65th years - ill health occurs.

extra sensory perception develops -

1961 - ill health - for family or himself

1968 - ill health - intuition develops

74 years 5 months 29 days

Ketu Mahādasa ^{in the 8th house} is started (negative infl.)
for 6 years

However it is associated with RAVI (auspicious)

Not through
the mouth

During that period there will be problems
in the throat and in the stomach

V

chance
to see
delegation)

Until 2 more years there can be some trouble due to fire and other blunt instruments.

- trouble in throat and stomach -

In September Saturn will enter the 8th house - it may create further health troubles

Sept Oct 77 do not appear very auspicious period.

This period will last until 28 FEB - 1978 -

after that influence will diminish a little but it will be there till FEB - 1980 -

after 1980 - FEB - Venus comes and a better period starts
if Prabhupada lives until then then there is every chance that he may live until 100 -
